Titanium Heat Sleeve

Titanium Heat Sleeve is the best protection sleeves on the market. This sleeve won’t change the color ever. It is made by pure titanium fiber braided.

Titanium Heat Sleeve offers the best possible sleeve protection on the market today. Developed specifically for any application where extreme high heat is present, this Titanium Heat Sleeve is used to protect wires, lines and cables when exposed up to 1800°F direct heat/2500°F radiant.

Titanium Heat Sleeve provide superior thermal protection for street vehicles or race engines, protecting fuel, oil lines, spark plug and electrical wires from direct or under hood radiant heat.

This Titanium Heat Sleeve use same material of our Titanium Spark Plug Boot Protector.
